Education

Indian Institute of Technology, Roorkee

Nov. 2020 – May 2024

Bachelor of Technology in Electronics and Communications Engineering

C.G.P.A : 8.228

Experience

Goldman Sachs

July 2025 – Present

Software Engineer

Bangalore, Karnataka

- Built the Advisor Portal end-to-end spanning UI and backend, providing independent financial advisors seamless access to investment tools and data; onboarded **3,500+ new accounts** and drove a **38% increase** in analytics utilization
- Developed a **Module Builder** tool enabling portfolio managers to flexibly query datasets and compose custom charts and tables for actionable insights; integrated **Dashbot**, a **RAG-based AI assistant**, allowing users to fetch and visualize data through natural-language chat instead of manual configuration
- Engineered an **end-to-end automated Report Generation** platform for the sales team, replacing a fragmented manual workflow of data retrieval, chart creation, and document assembly; condensed the entire process into a **few clicks**, producing pitch-ready reports with required disclosures, styled data visualizations, and **AI-generated commentary** that interprets chart insights inline, allowing to reduce the whole process time from hours to few minutes

Meesho

June 2024 – June 2025

Software Development Engineer

Bangalore, Karnataka

- Developed **"Pay Before Delivery"** feature in the mobile application, enabling post-order shift from Cash on Delivery (COD) to prepaid payment methods, resulting in a **1.12%** increase in prepaid orders
- Revamped Cart Service architecture for improved reliability and scalability, enhancing overall system performance
- Built in-house end-to-end testing suite to mock both stateful and stateless services for efficient local testing

Zepto

May 2023 – July 2023

Software Development Engineering Intern

Bangalore, Karnataka

- Worked on creating functionality of shopping list over the app allowing users to easily create and manage orders for a streamlined shopping experience by creating required search, query services and functions over Python and Go

Optimism Ltd.

January 2023 – March 2023

Machine Learning Intern

Remote (London)

- Pioneered AI-generated art projects leveraging Stable Diffusion technology for high-quality digital artwork creation
- Enhanced digital artwork resolution using Enhanced Super-Resolution Generative Adversarial Networks (ESRGAN)
- Created automated Shell pipeline for streamlined user result generation and optimized it for Apple Silicone architecture

Projects

OurGo | Java, Python, Javascript

June 2024

- Developed comprehensive web-based platform for creating travel itineraries tailored to individual user preferences
- Implemented group trip matching allowing users to join trips with like-minded individuals based on shared interests
- Leveraged Google Gemini's advanced language processing capabilities and web scraping techniques to generate detailed itineraries including accommodation, transportation, activities, and dining recommendations
- Built personalized recommendation system utilizing Spotify's Voyager algorithm to match users with group trips.

Realtime Wildlife Detection and Classification System | Python

January 2024

- Trained ML model for wildlife species detection using real-time thermal video feeds with integrated warning system
- Implemented quantization and pruning techniques to optimize inference time on NVIDIA Jetson Nano using TensorRT, increasing FPS from 0.8 to 3.54 with only a 1.27% drop in accuracy
- Developed preprocessing pipeline using Mixture of Gaussians (MOG2) background subtraction and morphological operations for enhanced low-contrast thermal video processing to create a final ensemble with accuracy of 88.46%

Achievements

- Codeforces maximum rating of **1785** (Handle : tachyon-11)
- Codechef maximum rating of **2070** (Handle : tachyon_111)
- Gold Medal in Inter IIT Tech Meet 12.0, IIT Madras
- Bronze Medal in Inter IIT Tech Meet 11.0, IIT Kanpur

Technical Skills

Languages: C++, Python, Typescript, Java, Go, Javascript, MySQL, C

Technologies/Frameworks: MongoDB, Springboot, FastAPI, React, Angular, Redis, Pytorch, TensorFlow, Git, Jenkins, NewRelic, Grafana, Kafka
